

SUMMARY

Subject matter of the dissertation: Problems of state regulation in a modern market economy.

Author of the dissertation: Lisa Kurieva

Scientific supervisor of the master's dissertation: PhD, associate professor Tatyana Kasaeva Vladimirovna.

Background research: Experience shows that a market economy, in its pure form, can not exist. The state has to intervene in the economic mechanisms of a market economy for the purpose of adjustment and regulation. If the state will not participate in the redistribution of income, the production of public goods and will not support business, society will undergo a number of negative trends, which ultimately can lead to an increase in social conflicts, political and economic instability.

Objective: the study of modern mechanisms of state regulation of a market economy and possible ways of its improvement in foreign countries and in Russia.

Tasks: 1) to explore the nature, causes and objectives of state regulation of a market economy; 2) to characterize the instruments of state regulation of a market economy; 3) to study the different concepts of state regulation of a market economy; 4) to assess-current models of state regulation in the economies of foreign countries; 5) analyze the experience of state regulation in foreign countries; 6) analyze government regulation of the economy in Russia; 7) identify promising mechanisms of state regulation of a modern market economy in foreign countries; 8) identify problems and identify ways to improve the state regulation of the Russian economy.

Theoretical and practical significance of the research: The theoretical results of the research can serve as a source of information for further development of state regulation of a modern market economy. The findings are of interest to the government of the Russian Federation in the process of building a social market economy.

Results of the research: 1. The essence of the reasons and objectives of state regulation of the economy. 2. describe the main instruments of state regulation of a

market economy. 3. To explore the concept of state regulation of the market economy. 4. identified and analyzed current models of state regulation of the economy in foreign countries. 5. analyzed foreign and Russian experience of state regulation. 6. The promising mechanisms of state regulation in foreign countries. 7. identify problems and ways to improve the state regulation of the Russian economy.

Recommendations. In order to improve the state regulation of the economy in modern Russia it is necessary: 1) linking the policy of public revenues with the policy of economic growth as a whole; 2) the use of national planning; 3) stabilization policy, including the use of monetary instruments.

Russia is recommended to apply the experience of the following developed countries: 1) Germany - in terms of building a socially oriented market economy; 2) France - regarding the state of indicative planning; 3) The EU as a whole - on the development of public-private partnerships; 4) Norway - in terms of the development of the oil and gas industries; 5) Canada - in terms of the development of the regions of the Far North.
