

## SUMMARY

**Subject of the thesis:** Communication Strategy of International Terrorism in the Context of Threats to National Security of the Russian Federation

**Author:** David Suleymanov

**Academic Adviser:** Panin V.N., Professor, Doctor of Political Science

**Organization:** School of International Relations, Chair of International Relations, World Economy and International Law, Pyatigorsk State Linguistic University.

**Relevance of the research issue:** in the current realities for the Russian Federation, international terrorism is a threat to the territorial integrity, sovereignty and constitutional order of our state. In this regard, Russia regards international terrorism as a direct threat to its national security and directly to national interests, therefore the elimination of terrorist threats is one of the priorities of both domestic and foreign policy of the Russian Federation, which actualizes the task of understanding the essence and content of this phenomenon of the present day.

**The purpose** of the work is to identify the main problems of the national security of the Russian Federation, determined by the communication activity of international terrorist organizations and to suggest mechanisms for communicating counteraction to international terrorist activities.

**Research objectives:**

- to generalize scientific views on terrorism as a communication phenomenon, identify key problems of its interpretation and perception;
- determine the place of the communication strategy of international terrorism in the system of threats to the national security of modern states;
- identify the main problems of the national security of the Russian Federation, determined by the communication activity of international terrorist organizations;
- to propose mechanisms of information and communication counteraction to international terrorism.

**Scientific novelty:** approaches to understanding terrorism as a communication phenomenon of the present are revealed, the content, target orientations and functional capabilities of the communication strategy of international terrorism and the threats and risks of national security determined by it are determined;

- identified the main problems of the national security of the Russian Federation, due to the communication activity of international terrorist organizations, and proposed mechanisms for information and communication resistance to international terrorism.

**Structure:** is determined by the purpose, objectives and internal logic of the problem under investigation and consists of an introduction, two chapters, which include 4 paragraphs, conclusions and a bibliographic list containing 78 sources, including 24 of them in foreign languages, and 5 applications. The total amount of work is 60 pages of typewritten text.

**Summary:** “in the course of the analysis, we came to the conclusion that the solution to these problems should be a comprehensive approach to organizing counter-terrorism at the federal and regional levels. In our opinion, this approach can be implemented in the following main areas:

- 1) diagnosis of the regional situation, the definition of specific characteristics of terrorism at the level of the subject of the Russian Federation;
- 2) the formation of a system of "targeted" information and communication counteraction to international terrorism;
- 3) ensuring effective practical and informational interaction of subjects of counteraction to international terrorism;
- 4) organization of effective interaction with the media;
- 5) Internet regulation and counteraction to cyberterrorism;
- 6) effective use of economic and human resources;
- 7) preventive work.
