

Abstract

Subject of the thesis: Regulation of the food import in the Russian Federation

Author: Hatueva Mariam Alievna

Academic Adviser: Romanko L.V. Assistant Professor, PhD, Economic Science

Organization: School of International Relations, Chair of International Relations, World Economy and International Law, Pyatigorsk State Linguistic University.

Relevance of the research issue is due to the significant role of problems in food provision security, which becomes very important during crises in the world economy. The food sector is a sphere of strategic interests for the economy of any country, which requires special attention. For many countries, the threat of food security is increasing by the instability of the political and socio-economic situation, as well as by a climate change.

For the economy of our country, the study of the problems of food imports regulations is relevant because it:

- specifies the key directions of the Russian foreign economic policy in the terms of liberalization of world economic relations
- reflects the trends in the development of the Russian food complex and its role and place in foreign markets
- reveals the main problems of food security in our country.

The purpose of the work is to study the issues of regulating food imports in the Russian Federation and to ensure the food security of the country.

Research objectives:

- to consider the theoretical basis and methods for analyzing the world food market;
- to analyze the current state of food markets;
- to study the main issues of food security in the context of multilateral regulation of foreign economic relations;
- to determine the role of Russia in the international food trade at the present stage;
- to reveal the degree of influence of foreign sanctions on the food security of the Russian Federation;

The scientific novelty of the research is in a consideration of the food import regulations of the Russian Federation, taking into account the latest factors in the development of the foreign economic relations - the WTO membership and the impact of anti-Russian economic sanctions.

The structure of the work consists of introduction, three chapters, which include 6 paragraphs, conclusion, a 163-reference bibliography (25 of them are in foreign languages). The total volume is 75 pages.

Summary

The modern world food market is experiencing a radical transformations:

- in the last three decades, the methods and structure of food production and the geography of international trade have changed significantly;

- The trade flows in the international food trade have changed significantly, which was due to the shift in demand for a number of types of agrarian products. Products of the tropic zone were displaced by ones of the moderate climate zone because of this shift.
