SUMMARY

Theme: The conflictogenic potential of the region (for example ethnic conflicts in the NSFC).

Scientific adviser: Vartumian A.A., doctor of political science.

Organization: The Institute of International Relationships; the international relations, Department of Conflict Resolution, public relations and journalism; Pyatigorsk State Linguistic University.

The research currency: Nowadays, our country is in a State of economic, political and social transformations and every region of our country, they have the individual form. These changes in the NCFS have an economic, political, ethnic and other conflicts.

Factors of this negative reaction (backlash) are the geographical situation of the region. More specifically, the existence of the border with several States? mental characteristics the population, poor infrastructure, different level of the government economic support from the Federal Center, different level of access to power structures or other areas to influence the social, economic and political reality. The combination of all these conflicts is the conflictogenic potential of the region. Because of the links and interactions with other social processes, the study of the conflictogenic capacity has become more actual over the last 20 years.

Scientific novelty of the research. Studying the problem numerous professionals is various in science industries: economics political science, sociology, ethnology, sociotics, but conflict theory is relevant to all kinds of conflict. And such scientists as M.A.Astvatsaturova, V. A. Avksentiev, A.A. Vartumian, A.V.Dmitriev, V.N.Panin, V.V.Chernous, V.M.Jurechko and others have made significant contributions to the development of the conflictology and particular in studying the conflictogenic capacity.

I tried to study the issues in this work, too. The object of this ethnic conflicts, the subject - conflictogenic potential of the region for the example of the ethnic conflicts in the NCFS.

The research purpose The aim of this work is to highlight the major
approaches for regulation of the conflictogenic potential of the region, and the disclosing the specifics of ethnic conflicts in the region.

The research work structure: an introduction, 2 chapters with 3 clauses in each, a conclusion and references with. Total volume of the research work is 65 pages.

The results my research was the analysis of the main distinguishing characteristics of the regional conflict, identifying the characteristics of their functioning, the study of the various ethnic, social, and territorial issues in Dagestan, KCR, KBR, CR, RNA-Alanya, a survey among students in order to ascertain the availability of conflictogenic capacity.

Examination and identification of the most effective methods to minimize capacity.

The use of all scientific and structurally management conflict resolution options allow to stabilize the situation in the region and will contribute to growth in all areas.
