

Abstract

Graduation Level of Proficiency Paper (Bachelor's degree)

Subject matter: Phraseological activity of the military vocabulary of the Spanish language: the didactic aspect

Author: Vorobeva Ekaterina Aleksandrovna

Supervisor of studies: Candidate of Pedagogic Sciences, Assistant Professor of the Chair of Spanish Studies and Intercultural Communication of Pyatigorsk State University, Filatova Natalya Ivanovna.

Information about customer organization: Institute of Roman and German Languages, Informational, and Humanitarian Technologies, Federal State Budgetary Educational Establishment of Higher Professional Education “Pyatigorsk State University”.

Topical Importance: the relevance of the research topic dictated by the need to enrich the collection of materials on the study of the phraseology of the Spanish language in order to facilitate the study of existing problems in the language.

Goals: the main purpose is studying the features of the semantic composition of Spanish phraseological units containing military terminological and professional vocabulary in their composition, identifying the national identity of these units.

Tasks:

- to identify and summarize the theoretical foundations of the study of phraseology in Russian and Spanish linguistics;
- to consider the concept of "phraseological unit";
- to explore various classifications of phraseology;
- to consider the Spanish language picture of the world through military vocabulary;
- to identify the basic terms of military vocabulary, the most actively involved in the process of phraseologization;
- to analyze the linguistic and cultural features of phraseological units of a “military nature”.

Theoretical value and practical applicability: the theoretical significance of the work lies in the new possibilities of studying Spanish idioms, deep penetration into the Spanish language picture of the world. It facilitates the study of the links between history, culture and their reflection in phraseology through the use of military vocabulary.

The practical significance lies in the fact that the results of the study can be used when reading lecture courses in comparative linguistics, in conducting seminars and special courses in lexicology, phraseology, in writing term papers and dissertations, in the practice of language teaching. The research materials may be useful for translation theory and translator practical work when developing ideographic dictionaries.

Implementation advice: the results of the study can be used in teaching Spanish. We have developed a database of phraseological units of the Spanish language of a military nature and exercises aimed at the formation of lexical skills and consolidation of the data of phraseological units. This product is designed not only for students of linguistic faculties, but also for everyone who wants to learn Spanish.
