

## SUMMARY

**Subject matter of the dissertation:** Increase of economic safety of the sanatorium-and-spa complex of Russia on the basis of perfection of mechanisms of state-private partnership.

**Author of the master's dissertation:** Khuzhokov Tamerlan Khabievich.

**Scientific supervisor of the master's dissertation:** Taran Oleg Leonidovich.

**Customer organization:**

**Topicality of the research:** The inadequate elaboration of the issues of application of the mechanisms of public-private partnership and tools for the development of the sanatorium and resort complex of Russia in order to ensure its effective, economically safe development determines the relevance of the research topic.

**Objective:** The goal of the research is to analyze and find ways to improve the interaction of the state and business in the interests of socio-economic development and improve the economic security of the Russian resort and sanatorium complex using the mechanism of public-private partnership.

**Tasks:**

- to study the basic theoretical and methodological aspects of the socio-economic development of the sanatorium complex and its economic security;
- to conduct an analysis of the general development trends and the state of economic security of the sanatorium and resort complex of Russia;
- to reveal modern features and problems of interaction of the state and business in the sanatorium complex; - to study successful practices of improving the economic safety of a sanatorium resort using public-private partnership mechanisms;
- suggest ways to improve the mechanisms for increasing the competitiveness and investment attractiveness of the domestic sanatorium and resort complex, as a necessary condition for improving its economic security;

propose measures to improve the state support for the development of the sanatorium and resort complex in order to ensure its economic security.

**Theoretical and practical significance of the research:** Theoretical significance of the research is that the provisions formulated in the work can theoretically serve as a complement to the theory of the conjugation of interests of interaction between the state and business in the interests of socioeconomic development and improving economic security sanatorium and resort complex of Russia. The practical importance of the study is determined by the fact that its main provisions and conclusions have a practical focus and can be used in the system of public administration at both the federal and regional levels in the development and improvement of subprograms for the development and enhancement of the economic safety of the sanatorium complex, mechanisms of public-private partnership.

**Results of research:** The conducted researches testify to the necessity of correcting the measures for the implementation of state policy and state programs aimed at the development of the sanatorium complex, since the effective development of the sanatorium complex is not possible without state support, investment investments, and how consequence, interaction of authorities and management with business structures.

**Recommendations:** Effective interaction of power and the sanatorium complex is possible through the implementation of the following forms and types of state support for the industry: subsidizing the interest rate on loans received by the organizations of the sanatorium and resort complex; subsidizing expenditures for the development of the material and technical base; support of investment projects using the mechanism of public-private partnership by executive bodies of state power; reimbursement of property tax, in connection with the transition to levying land and property taxes on cadastral valuation.
