

## Summary

**The topic of the graduate work:** Controlling social sector development in a municipal unit (based on the materials of a Khazbek municipal unit, Karachaevo Cherkessia).

**The author:** Fatima Tuarsheva

**The scientific adviser:** doctor of historical sciences, professor, E.A. Abulova

**Information about the organization-customer:** Counsel of Khazbek municipal unit, Karachaevo Cherkessia

**Topicality:** The development of a municipal unit's infrastructure is one of the reasons for huge expenses of the local budget. Social sector covers the main part of so called «state employees» who get their incomings from the budget funds. That is why one of the major tasks for local governments is to create and implement a principally new social policy.

**The purpose:** is to carry out a complex analysis of the development and controlling process in a social sector in a municipal unit.

### **Aims:**

- To consider the notion and the essence of the social sector of a municipal unit;
- To study the foreign experience of the controlling process in a social sector of a municipal unit;
- To describe the process of the functioning inside of a municipal unit using the example of the Khazbek municipal unit;
- To suggest the best ways for the improvement of the controlling processes in municipal units.

**Theoretical and practical significance:** the findings and suggestions formulated in the work concerning managing system of personnel operations can be used in the further scientific development and elaboration of the named issue. The practical significance of the work lies in use of the work's results in daily work by public institutions that will lead to the improvement of their status.

### **The results of the research and recommendations:**

The plan for improving controlling processes in a municipal unit can be presented in the following steps:

- 1) It is necessary to carry out a system of indexes characterizing the quality of life; the system might include the following groups: a) indexes of the life quality (purchasing capacity, housing conditions etc.); b) social-demographic characteristics (grouping the population according to the index of social protection and maintenance).
- 2) It is essential to determine the factual meaning of these indexes.
- 3) The municipal units must also determine the degree of deviation between factual and fixed indexes.
- 4) At the next level municipal governments detect the reasons for positive and negative index-deviations.
- 5) The municipal governments check out if there are any ways for improving indexes;
- 6) The municipal governments work out a new plan for improving the quality of life for people using the given indexes.
- 7) The municipal governments establish the dates for the complete fulfillment of the plan for factual index-improving.
