

Report

Topic of the final graduation paper (work): The implementation of the state policy in the field of social protection of children with disabilities at the regional level (based on the materials of RSI* for disabled children “Republican Stationary of Rehabilitation center for children with disabilities “Rosinka”)

The author of F.G.P. (final graduation paper): Daurova D.S.

Scientific Director of F.G.P: CES** assistant professor of Creative Innovation management and law department Mai-Boroda G.N.

Data about customer-organization: RSI center for children with disabilities “Rosinka”

Relevance of the research topic: The relevance of research on questions of implementation of the state policy in the field of social protection of children with disabilities at the regional level is due to several factors, which create the necessity of theoretical comprehension and comprehensive scientific analysis of the problem which is connected to the work at the regional system at social protection of children.

Goal of the paper (work): Identifying features of the state policy in the field of social protection of children with disabilities at the regional level, development of scientific basis for recommendations on its improvement.

Tasks: - To examine the structure and contents of state social policy regarding children with disabilities;

-explore legal regulation of state policy regarding children with disabilities and determine the issue connected with its improvement.

-identify the problem of social protection of children with disabilities at the regional level.

-explore the system of social protection of children with disabilities in KCHR.

-develop recommendations on improvement of social protection of children with disabilities at the regional level.

-offer a project of improvement on work done by RSI for disabled children “Rosinka” in the field of social protection of children with disabilities.

Theoretical and practical significance of the results of the research: theoretical significance of work is in analysis, generalization and systematization of theoretical knowledge and practical experience in the sphere of state policy in the field of social protection of children with disabilities at the regional level. The practical significance of the research is in the fact that its results can be used while developing and implementing regional policy in the sphere of social protection of disabled children.

Results of the research: In recent years in KCHR there has been a tendency toward improvement of social support for families with disabled children. The analysis of work done by RSI for children with disabilities has shown that a center, as a subject of state social policy of KCHR, is functioning successfully.

Recommendations: The necessity of constant improving of professional preparation of the workers in modern conditions gives a possibility to offer a model to

perfect the professional qualities of the specialists, which are necessary for successful work with disabled children.

The system analysis carried out by us allowed to introduce a comprehensive model of medico-social-psycho-pedagogical rehabilitations of children with disabilities at regional level.
