Abstract

**Subject matter:** Scientific text as an object of translation analysis.

**Autor:** Puzyrev S.D.

**Scientific supervisor:** Zaitseva O.L., Naimushin B.A.

**Information about the sponsor organization:** Pyatigorsk State University; 9 Kalinin St., Pyatigorsk, Stavropol Krai.

**Research relevance:** is due to the need to give the most complete description of the linguistic text as a result of the cognitive and research activities of its author, which contributes to the accuracy of the translation of the English scientific text into Russian.

**Purpose:** the establishment of formal and content characteristics of linguistic texts for use in their subsequent interpretation.

**Tasks:** the boundaries of the text context are determined to establish the semantic integrity of the text, an analysis of the contexts is carried out in terms of solving research problems in them, and the forms and levels of the scientific text are described.

**Theoretical and practical significance:** it is possible to solve some of the difficulties that the translator faces when translating scientific texts regarding their structure, as well as applying the results of research in the practical work of translating scientific articles.

**Results of the research:** can contribute to the development of translation of scientific texts.
