Summary

Subject matter: IT-technologies in the context of teaching foreign language in secondary school

Author: Lazarenko Yuliya Vyacheslavovna

Supervisor: candidate of pedagogical science of Chair of Intercultural communications, linguadidactis, pedagogical technologies of training and education, Phd of pedagogics Krasnozhonova E.S

The supervising organization: Pyatigorsk State University.

The relevance of the study is caused by the growing interest of the usage of IT-technologies in the process of studying foreign languages.

The aim of the research: is to reveal the direct dependence of the result of teaching foreign languages on of the usage of modern information technologies and to define the major ways of the usage of IT-technologies in the educational process.

Objectives:

1. to clarify the content of “IT-technology”;
2. to consider purposes, objectives and features of using IT-technologies in a foreign language lesson in secondary school;
3. to determine the practical application of information technology, Internet resources and Smart board in English lessons;
4. to develop a product in the form of an algorithm for creating a personal website for a foreign language teacher.

The theoretical and the practical value of the research: is based on identifying meaningful patterns and positive influence of the IT-technologies and Internet resources on the process of studying foreign languages. Practical significance lies in the approbation of using Internet resources in the educational process and the development of the algorithm for creating a personal website for a foreign language teacher.

The results obtained the pedagogical appropriateness of using IT-technologies in the educational process was proved; the content of “IT-technology” was clarified; purposes, objectives and features of using IT-technology in secondary school were
considered; the practical application of information technology, Internet resources and Smart board in English lessons were determined; an algorithm for creating a personal website for a foreign language teacher was developed.

**Recommendations:** the considered IT-technologies, Internet resources and work with the Smart Board will help teachers of the secondary school to conduct productive lessons of foreign languages. The developed algorithm for creating a website will help teachers to overcome the fear of using unfamiliar IT technologies and to show the effectiveness of their application in the educational process.
