The present research paper is an attempt to study the specificity and some methods of translation of radio news texts from English into Russian drawing on the example of radio news texts of the VOA, BBC, CNN. The author analyzes some specific features of media texts in general and radio news texts in particular. The research is based on the analysis of theoretical material on translation, translation models and methods, as well as practical material of radio news texts.

With regard to the aims and tasks set in the work the Paper consists of Introduction, 2 Chapters, Conclusion, and Bibliographic list.

Chapter I deals with the place of radio news texts in a variety of media texts, gives the definition of the notion of media texts drawing on the example of radio news texts and their linguistic specificity.

Chapter II is devoted to the consideration and analysis of the specificity of translation (translation techniques and transformations used in the translation) of media texts drawing on the example of radio news texts. Among the main translation techniques of radio texts there are lexical, grammatical and lexical-grammatical transformations, loan translation, transcription / transliteration (proper names), modulation, etc.

The Paper is concluded with the results reached after careful considering the topical problems in the investigation.
