**ABSTRACT**

**Subject matter:** Linguistic and Translation Peculiarities of Interpreting Medical Terms.

**Author:** Dmitriy V. Tchikildin, 4th year student, Institute of Translatology and Multilanguage Studies.

**Supervisor of the project:** N. A. Stadulskaya, Associate Professor of the Chair of Theory and Practice of Translation and Interpretation.

**Information about the sponsor organization:** Pyatigorsk State Linguistic University; 9 Kalinin St., Pyatigorsk, Stavropol krai.

**The research is topical** because it is the necessity of research in this field in terms of translation, as this problem raises many disputes among different Interpreters’ Schools.

**The purpose of the research** is a comprehensive analysis of medical texts and their translations, and description of methods of translating.

The tasks addressed in the present thesis are to determine the main interpreting approaches used to translate medical terms; to investigate the linguistic features of medical texts; to identify the main difficulties in translating medical texts and find appropriate solutions.

**Theoretical value and practical applicability** of the study is that it makes a contribution to the study of problems of translating medical terms, lighting some of the problems associated with literary translation, as well as providing a comprehensive study of medical language and finding various ways of its rendering to the target language. The results of the study may find practical application in courses and workshops in the general theory of translation and in teaching literary translation.
