**Abstract:** 1. Greeting in the English language operates mainly in two versions and is characterized mainly low-high terminal tone a tone, sometimes with middle pre scale. The configuration of the terminal falling-rising tone. Rising tone ends at low-high or high level. Dynamic maximum absence of the user acoustically pre scale perceived as more intense, is comparative to the kernel. When comparing the dynamic characteristics of the Hello there was a weak degree of contrast, temporal - bright. Middle- sound duration in each phrase components evenly distributed.

2. Russian etiquette formula "Hello" is characterized mainly by the terminal tone combined with medium pre scale. Frequency range narrowed, the dynamic range is extended. Maximum tone in the phrase is localized in the stressed syllable
