Title: Using the potential of Web-services at the Classes of English

Author: Yagubova A.A.

Research Advisor: Tatiana Yarmina

Research Initiator: Institute of International Service, Tourism and Foreign Languages

Topical importance is determined by insufficient linguistic research in the field of foreign language teaching and application of web-services in teaching foreign languages.

Goals: definition of conceptual bases of training in the modern paradigm; development of a series of exercises on teaching communication in English using web-services.

Tasks: to create conditions for construction by pupils of the image of the future; to train pupils of competence of communication; to direct efforts to work together with pupils not so much professionally but creatively.

Theoretical Value and Practical Applicability: the research gives a specific and detailed analysis of the role of learning technologies in the development of foreign communicative competence of secondary school pupils. The results of the study can be used by school teachers in foreign language teaching.

Results: mastering by formal structure of different types of texts and activities in a studied language through innovative methods of teaching.

Implementation Advice: the study can be useful for school teachers of foreign languages to work out new lead-up to methods and means of teaching.
