Theoretical value and practical applicability. Final qualifying work consists in possibility of its main provisions and conclusions for the expansion of ideas about the place and role of archaeological tourism in modern society. The main provisions and conclusions contained in the final qualifying work can be used in the further development of theoretical and methodological bases of archaeological tourism. We have developed a tour that can be used as a ready tourism product.

Results. Designed archaeological tours in the Chechen Republic, is, in our opinion, ready for implementation of the tourism product. Its main value is that the program of this tour includes the events of educational nature, which will allow tourists to see the cultural and historical heritage of the area. Consequently, archaeological tourism can be an important aspect of maintaining cultural, historical and educational sphere of the Chechen Republic.

Recommendations. Analyzing the tourist offices of the region, we see that they are continuously working on the quality and variety of utilization of historical and cultural tourism product. But, nevertheless, in our view, the competitive advantage of tourism companies has increased, if they turned their energies to the development of the domestic destinations of historical and cultural tourism. Based on rich historical and cultural potential of the North Caucasus Federal district it is
possible to develop completely new directions for the region. They can be archaeological tours.
