Subject matter: Development Tendencies in German Aircraft Industry Vocabulary.

Author: Alexandra V. Shatskaya, 5th year student, Institute of Translatology and Multilanguage Studies.

Supervisor of the project: A. A. Sokhan’, Associate Professor of the Chair of Theory and Practice of Translation and Interpretation.

ABSTRACT

The graduation paper is devoted to the research in the field of the translation of the aviation terminology. The main goal of the graduation paper is to make a classification of the main types of translation and to describe them carefully.

The results of linguistic research of Russian and German contemporary scientists are used to present different approaches to the problem.

Due to insufficient level of the interpreter’s linguistic knowledge and the specifics of the strictly specialized field may lead to various mistakes and misunderstanding.

This graduation paper consists of introduction, two chapters with the inferences, conclusion and bibliography.

The first chapter describes the terminology as a science, gives a description of the subsystems of terminology and shows the ways of word foundation in the field of aviation and aircraft construction.

The second chapter is dedicated to show the main types of linguistic transformations and all ways of possible translation in Russian language, according to the specificity of German language.

Each chapter is concluded with the inferences on the problems searched in the chapter.

General inferences are represented in the Conclusion

The special feature of this graduate paper is in the use of the modern sources, aviation magazines, literature and teaching materials in Russian and German, to reflect the problem.
