**Abstract:** The present paper is dedicated to the study of ways of expressing computer slang in English and Russian languages which attract reader’s attention emphasizing this type of slang from some others. The goal of the research is to identify how slang is expressed through different words in Russian and English languages.

In Chapter I the theoretical background to this research is observed, the terms «text», «national language» and «slang» are defined, and different types of slang are reviewed.

Chapter II is devoted to the study of formation of computer slang in English and Russian languages. In this part of paper different ways of expressing of the computer slang are reviewed.

So, the classification developed in this paper enables us to make a conclusion that despite the fact that slang is a universal phenomena there is national specifics in the ways it is expressed by.
